

Trim60 linear trimmer

Digital Finishing Group

The Trim60 was designed to cut large format graphics, signs, foam board, corrugated cardboard and much more. It produces clean, accurate, straight cuts that are guaranteed accurate to .009 inches. Simple blade adjustment controls make cutting materials of different thickness a breeze. The bottom of the Trim60 is fitted with two full-length silicon strips. These strips not only ensure a secure and stationary position while cutting, but also will not mark the material that it is placed upon. The Trim60 also has an ergonomically designed handle that will maintain operator comfort for the entire use of our product.

The Trim60 is extremely portable as it can sit on a table or be used with our optional lightweight floor stand and waste catcher. The stand features four independent rubber non-slip, non-marking, non-scratching wheels that lock in place to prevent rolling while in use.

Features

- **Cut almost any material up to 1/2"**
- **Easy to change blades**
- **Ergonomic handle makes it easy to apply the appropriate amount of pressure and cutting force**

Max Cutting Length:
60"
