Thank you for choosing the DFG OfficeComb binding machine. We are glad that you have chosen our superb machines to give you the easy, comfortable, smart advantage in your work.

## Features:

- Durable, attractive design
- Hardened die-pins offer extra long-lasting performance
- Machine punches and binds in accordance with worldwide industry standards
- Binding combs can be unbound and re-used, and pages added or removed.
- A variety of different combs and covers can be used without difficulty.
- Easy operation and excellent function deliver attractive, strong documents.

## Machine Diagram:

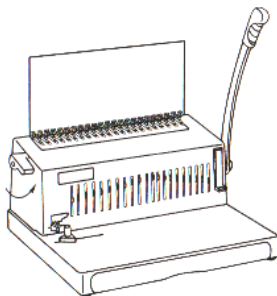

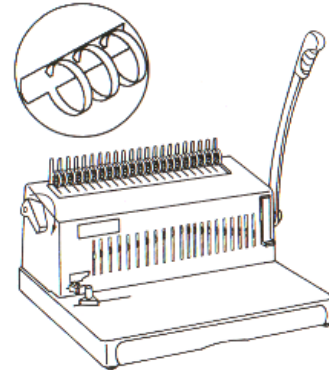

- 1 Comb posts
- 2 Comb opener fingers
- 3 Side margin control
- 4 Unit base
- 5 Punching and binding handle
- 6 Disengagable pull pins
- 7 Paper throat
- 8 Back margin control

Operating instructions:

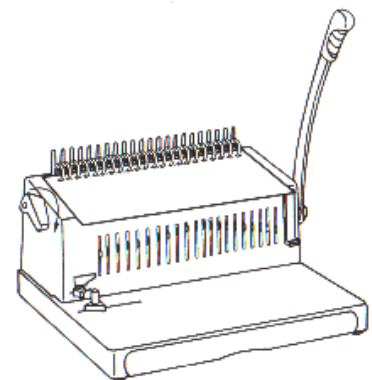

1. Set up side margin, punch margin, and pull-pins according to the document being bound. Insert sheets to be bound into punch throat, flush against inner wall and then line up against the side margin guide. Pull the handle to punch sheets (up to 15 sheets, 20-lb. bond paper).

2. Place binding comb onto the comb posts at the top of the machine, spine facing away from the operator and comb opening facing upward, and move the binding handle to open the comb. (Actual binding handle may vary from illustration)

3. Insert the punched document sheets onto the comb element and, when all desired pages are loaded onto the comb, move the binding handle back to close the comb. Binding is completed. (Actual binding handle may vary from illustration)

4. To unbind, edit, and rebind documents, repeat step 2, remove sheets for revision and/or add new sheets desired, and close the comb again (per step 3) to finish rebinding the document. (Actual binding handle may vary from illustration)
